Professional Summary

Creative and driven software developer seeking an entry-level position. Equipped with a strong foundation in software engineering from WeThinkCode, including systems integration, backend development, QA, and web development, I am eager to apply my skills to challenging projects. With a proven track record of delivering high-quality work and a collaborative mindset, I thrive in team environments and enjoy taking on leadership roles. My love of creativity and problem-solving motivates me to create original solutions for pressing issues.

I am dedicated to continuous learning and growth, eager to contribute my skills to a dynamic and innovative team. Let's work together to build impactful software solutions that make a positive difference.

Core Competencies and Skills

Technical skills

- **Programming Languages:** Python, Java, HTML, CSS, Javascript
- **Frameworks and libraries:** Django, Streamlit
- **DevOps:** CI/CD (Gitlab, Github)
- **Databases:** SQL Server, SQLite
- **DevOps:** CI/CD (GitLab, GitHub)
- **Tools & Platforms:** Git, Visual Studio, IntelliJ IDEA, Linux (Ubuntu)
- **Software Development Practices:** Version control, debugging, test-driven development, code optimization, REST API design and implementation, unit and integration testing

Interpersonal and Professional skills

- Effective communication and teamwork for cross-functional collaboration
- Strong problem-solving and adaptability
- Proactive time management and organizational abilities
- Continuous learning with a commitment to self-development and skill enhancement
- Ability to build trusted relationships with team members
- Positive, open-minded, and feedback-driven approach

Education

WeThinkCode, Higher Certificate (NQF 5) - Systems Development (Computer Software Engineering)

September 2023 - Present

- Acquired expertise in Python, Java, test-driven development, and full software development lifecycle processes.
- Focus on systems integration, backend development, client-server interactions, and DevOps practices.
- Currently advancing knowledge in software architecture, SQL, and full-stack development.

Simtfolile Secondary School, Mpumalanga

Completed NQF level 4

Volunteering

WeThinkCode, BootCamp Assistant

June 2024 - August 2024

Provided mentorship and guidance to new applicants, assist with Python fundamentals, and foster a supportive community for aspiring coders. Key contributions include helping applicants improve their coding logic and organizing peer-to-peer learning sessions.

Interests and Hobbies

- Active member of the WomenThinkCode club: promoting and mentoring women in tech.
- Passionate about art and design, hiking, and reading.
- Enthusiast for building automation tools and exploring new programming languages.

Languages

- English, Sepedi, Siswati, Zulu, Setswana
-
